FINDING DIRECTION IN TRAINING

Weidmann Electrical Technology

Weidmann Electrical employees in training.

Just like a GPS, training programs also require defining the route to take and what awaits you when you reach your destination. **Weidmann Electrical Technology, Inc.** located in Urbana, OH, produces insulation base papers at the Urbana facility and converts these papers to insulation paper products and components used in power and distribution transformers. Employees who enroll in their tiered program to increase their skills as a maintenance technician will acquire knowledge and abilities along the way, as well as, the financial benefit they will receive upon successful completion of each tier. This helps their employees stay engaged and motivated throughout their learning experience.
